

LASER 1 OPAQUE[®] Heat Transfer Paper

LASER 1 OPAQUE[®] Heat Transfer Papers are designed for both oil and oil-less laser copiers and laser printers for the heat transfer of high-resolution photographs and images to dark T-shirts, sweatshirts, mousepads, coasters, puzzles, handbags, binders, padfolios, paper, leather, magnets, wood veneer, nylon and more. Choose garments that have a tight weave. This is particularly important when transferring to sweatshirts.

PRINTING

1. LASER 1 OPAQUE[®] Paper works in most color laser printers and color laser copiers.
2. **DO NOT** mirror the image. Copy/print on the coated, unprinted side of the transfer.
3. LASER 1 OPAQUE[®] Paper should be fed into the copier or printer with the short dimension first (grain long) using the by-pass tray.
4. Trim away the unprinted areas of the transfer if desired.
5. Slowly peel the paper backing from the transfer film, starting with a small tear in the corner to make separating easier

TRANSFERRING Using A Commercial Heat Press

1. Place imaged transfer film face up on garment or substrate and cover it with the included ironing sheet. Re-use of the ironing sheets is not recommended. Place a flat single layer of fabric such as a pillow case or T-shirt over the ironing sheet. Press:
2 minutes at 300°F using medium pressure
2. Allow to cool completely before removing ironing sheet.

LASER
OIL and OIL-LESS

DARK COLOR

NO HAND IRON

TEMPERATURE	300°
PRESSURE	Medium
TIME	2 minutes

WASHING INSTRUCTIONS

Turn garment inside out and wash in cold water using a mild detergent. Do not use bleach. Dry on low heat setting. Do not iron directly on the transferred area.

STORAGE AND HANDLING OF LASER 1 OPAQUE[®] HEAT TRANSFER PAPERS

Store **LASER 1 OPAQUE[®] HEAT TRANSFER PAPERS** in a cool, dry area and do not remove from carton or poly bag until you are ready to use.

NOTE

Dark colored polyester and nylon are not recommended because the dyes may migrate through the transfer.

Refer to www.technicalproducts.com/heattransfer for information on our entire line of heat transfer products.

IMPORTANT

We thoroughly test each of our products on various substrates using different transfer equipment. However, it is impossible for us to duplicate all variables using all substrates and transfer equipment. Therefore, it is essential that you test the paper prior to production using your equipment, methods, and substrate material. Heat presses vary in accuracy. Conduct tests to determine the best time and temperature to use with your equipment. Please keep in mind that the Seller's and Manufacturer's maximum obligation shall be to replace any paper that has proven to be defective. Neither the Seller nor the Manufacturer shall be liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper.
